DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to an articulating pusher assembly comprising an articulating pusher, an adapter, a casing, a spool assembly, classified in class 227, subclass 120.
- II. Claims 14-25, drawn to an adjustable angle magazine comprising a housing, a universal adapter assembly, an adjustment assembly, an articulating pusher, classified in class 227, subclass 120.
- III. Claims 26-36, drawn to an adjustable angle nail gun comprising a handle, a nail driving assembly, an adjustable angle nose casing assembly, an adjustable angle magazine, an articulating pusher assembly, classified in class 173, subclass 48.
- IV. Claims 37-50, drawn to an articulating pusher comprising means for coupling, and means for engaging, classified in class 227, subclass 120.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed ^{such as} ~~because of the~~ an adjustable angle nail gun comprising a handle, a nail driving assembly, an adjustable angle nose casing assembly, an adjustable angle magazine, an articulating pusher

assembly as evidenced by claims of group I, II, III and IV. The subcombination has separate utility such as an articulating pusher assembly comprising an articulating pusher, an adapter, a casing, a spool assembly, an adjustable angle magazine comprising a housing, a universal adapter assembly, an adjustment assembly, an articulating pusher, to an articulating pusher comprising means for coupling, and means for engaging.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Christopher Rueppell on 7/22/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathaniel C. Chukwurah whose telephone number is (703) 308-6385. The examiner can normally be reached on M-F 6:00AM-2:30PM.

Art Unit: 3721
